An Act Concerning Residential Water Rates, Public Drinking Water Supply Emergencies and the Sellers of Bottled Water)

Support for Substitute SB 422

Bottled water. I can not believe a time has come that I have to take time to fight for my own water supply because someone wants to come in and bottle it. Please put regulations in place to protect our community and not a large business. This is common sense. Please use common sense and protect our citizens by supporting the Substitute bill.
